

## List of guiding questions (proposed for discussions)

### **Session I: Nationally Determined Contributions (NDCs)**

1. *Main question:* how the existing studies can be aligned to populate the CCCD databases leading to consistent information in the NDCs
2. What would be the design/content of NDC report including main sectors/interventions to be considered, tools to be used for estimating projections, reference for BAU scenario, etc.

### **Session II: Mitigation Policies and Measures (PaMs)**

1. *Main question:* how the existing studies can be aligned to populate the CCCD databases leading to consistent information in the PaMs
2. What will be the design/content of the PaMs Chapter that is aligned with the NDC report

### **Session III: Greenhouse Gases Inventory (GHGI)**

1. *Main question:* how the existing studies can be aligned to populate the CCCD databases leading to consistent information in the GHGI
2. How the GHG inventory will be developed in a different manner than the traditional old system and what would be the role of the consultants, what are the challenges to have a National Inventory System
