Reflections on Environmental Issues and Rio Conventions

CB3 Project's Acquaintance Guide for Juniors High and High schools

Content

Part One: Climate Change

I. Why is there a need to act?

- Indicators and Causes: The science behind climate change

II. What is the international community doing?

- The relevant Rio Convention: UNFCCC

III. What does the future hold?

- Future climate scenarios and shared socioeconomic pathways
- Egypt: Rise in sea-levels and threats of inundation

IV. What can you do?

- Carbon footprint, your local movements, and more.

Part Two: Biodiversity

I. Relevant Rio Convention: CBD

II. Significance and loss of biodiversity in Egypt

- Diversity of species and ecosystems
- Important Bird Areas (IBAs) and Important Plant Areas (IPAs)
- Egypt's Natural Protectorates

III. Biodiversity explained

- History, terminology, evolution and diversification
- Ecosystem services

IV. Measuring biodiversity

- Loss and threats
- Conservation

Part Three: Desertification

I. Relevant Rio Convention: UNCCD

II. Understanding Desertification

- Causes and Effects
- The Sahel Region

III. Future development and approaches to avoid desertification

IV. Desertification in Egypt: Causes and current status

Part Four: Linkages between Rio Conventions

I. Linkages and Feedback Loops among Desertification, Global Climate Change, and Biodiversity Loss

II. “Ecosystem Restoration”
