

White List

Any project to be submitted to Ministry of Environment for obtaining the letter of approval must have a plan for corresponding adjustments for the ITMOs that will be transferred internationally. The publication of white and positive lists proposed does not mean automatic approval from Ministry of Environment of the project or automatic issuance of a letter of approval.

The lists are subject to regular changes/amendments as per the developments in carbon markets and as per national circumstances.

White List
<i>Cross Cutting</i> • Renewable energy projects • Energy efficiency projects
<i>Petroleum</i> • Flare gas recovery projects • Green petrochemical projects • Green fuel projects • Low-emission fuel projects • Methane emission reduction projects • Fuel switching projects to lower-emission fuels • Bioethanol production projects
