

Positive List

Cross Cutting

- Small scale solar panels

Petroleum

- Flare gas utilization projects for remote or scattered fields (>50 km from nearest economic pipelines), or low flaring volumes (<0.7 MMSCFD) or requiring high-cost gas pre-treatment facilities
- Sustainable Aviation Fuel
- Carbon Capture and Storage / Utilization
- Sustainable Maritime Fuel (SMF)

Electricity

- Intermittent renewable electricity with >12-hour storage
- Geothermal energy projects for heating or electricity generation
- Cluster of renewable electricity generation and grid strengthening
- Cluster of renewable electricity and hydrogen (or derivative) production
- Solar thermal power plants
- Off-shore wind

Waste Management

- Recycling agricultural waste to produce ethanol
- Converting agriculture waste into organic compost
- Waste-to-energy projects
- Landfill gas capture with or without energy utilization
- Alternative fuels production and/or use e.g. RDF

Transport:

- Electric buses
- Metro
- Monorail
- Speed train
- Cluster of electric vehicles and charging infrastructure

Industry:

- Green hydrogen/ammonia production for domestic use or for domestic manufacturing processes (not for green hydrogen export under competitive conditions)
- Treatment of industrial wastewater
- Recycling of scrap metals
- N₂O destruction from chemical industry
- Ozone Depleting Substances destruction
